

### *Deva- Dimensional Energy Voice Analysis*

Every person has their own unique voice architecture  
that reveals the sound codes for health and wellbeing

#### What can you expect?

The voice architecture reveals in the analysis weak or heavy tonal frequencies and from this information we will discuss the relationship of this to the systems in the body, organs, bio-energy field, emotions and can then suggest various bio acoustic remedies which we supply to you to rebalance the voice.

#### Why you should have a Deva voice analysis

The computerised system may help uncover hidden factors about your long term health and wellbeing .The voice profiling or signature sounds can assist as preventative health and wellbeing maintenance and in the management of areas of your life and assist in the healing process. As previously said we supply products, as part of the voice reading, to rebalance the voice so helping to reprogram the body back into balance.

#### Voice profiling

This will identify stressed sound frequencies of the voice signature which in turn can be used as a tool to identify and interpret the dynamic interaction of the body's subtle mechanics. Every individual carries and emits their own unique sound signature which represents physical, emotional and energetic make-up. These are called sound codes.

- They increase body integrity and life energy
- Reduce stress and incoherent physical emotional patterns
- Release limiting patterns and increase clarity and creativity

#### DEVA

Voice analysis sessions include-

Personal voice pattern chart

Tone correlation-physical and emotional-

Map of tonal differences

Chakra impacts and cellular memory

From these results we blend a **combination of plant sounds, herbs, essential oils etc** to rebalance missing notes and to impact the subtle energetics of your systems and physical and emotional issues. The session lasts between ¾ of an hour to 1hour-

**The cost is £55 including sound remedies and P&P. We are happy to announce that long distance voice analysis is available by phone – not mobiles – and can also offer Skype readings.**

## **More information on DEVA**

### **DEVA- Dimensional Energy Voice Analysis---Architecture of the Voice**

To determine the individual vocal patterns a 4 minute sample of the voice is captured into our sound files. The high vertical axis identifies over-function areas, while the low axis identifies the under-functioning areas. Based on the vocal profile sound formulas are constructed and presented to the individual.

Once appropriate sound formulas are ascertained these are intended to bio-entrain the innate rhythmic vibrational patterns of the body. On finding discordance, sound formulas are given as a means of balancing the disharmony promoting the innate ability of the body to selfheal through entrainment.

*“The silent sounds of the human form. The sounds within the voice are dimensional representations of your state of wellbeing”*

*Colin Kingshott*

### **Altering the resonance of the body**

As a healing modality it must influence the body by altering the sound frequency resonance of the body. It is quite understood that such modalities of light, sound and music can alter the patterns within the body of an individual.

### **Voice analysis**

Once we have analysed the stressed areas of the voice these can then be compared to the sounds of the body. From this comparison we can then refer the energy material medica of sound solutions. If we had a perfect voice the architecture would show all of the 12notes registering equal hits. Such perfection does not exist. Due to poor lifestyle, genetic links and environmental factors our voice print will show a range of heavily hit categories and low hit categories giving health indications.

### **How does it all work?**

The sounds of the voice represent the composite frequencies of the human form. The 12 keynote frequencies in the body correspond to the 12 notes of the chromatic scale. The analysis reveals patterns in the body showing tonal frequencies on either over-functioning or under-function. This can empower the individual to understand the root course of the physical emotional energy imbalance.

*“Every illness is a musical problem -the cure a musical solution”*

*Colin Kingshott*

## **How your body and sound is related**

We as human beings are fuelled by electromagnetic energy and organised by our D.N.A. blueprint. The various organs, glands, systems of the human body are meant to function independently and also as a whole. The heart, lungs, pancreas and nervous system all have their own specialized actions. However to maintain health all systems and organs must be in constant communication with one another by way of sound frequencies. In other words each organ has its own keynote frequency with a sound signature envelope that resonates to specific nutrients, minerals, herbs, and essential oils etc. Fortunately these frequencies are beyond the hearing we have -12 keynotes presented in the human form.

### **C. C#. D. D#. E. F. F#. G. G#. A. A#. B**

If communication breaks down or if excessive or prolonged stress is placed on an organ an imbalance occurs. These frequencies found in the physical form are also found with music and just like music the NOTE E appears several times on a key board at various octaves. This is the same in the human form with dimensional sounds. If we had a perfect voice the voice architecture would show all of the 12 notes registering equal hits- Such perfection does not exist. Due to poor lifestyle, genetic links, environmental factors our voice print will show a range of heavily hit categories and low hits categories and it is these low hits that give health indications.

## **How does it work?**

The sounds of the voice represent the composite frequencies of the human form. The 12 keynote frequencies in the body correspond to the 12 notes of the chromatic scale. The analysis reveals patterns in the body showing tonal frequencies are either over- functioning or under-functioning. This can empower the individual to understand the root cause of the physical emotional energy imbalance

*“Every illness is a musical problem –the cure a musical solution”  
Colin Kingshott*

## **Frequency and the body**

The various parts of the body attract energy and communicate with each other by way of sound frequencies –in other words each organ has its own keynote that resonates to a particular mineral and sound vibration required for it to function.

These keynote frequencies found in the body relate to the frequencies in music. Until quite recently we may have been tempted to consider the human voice to be one sound which is distinctive from person to person but most definitely not revealing 12 individual sound frequencies. However through the technology of DEVA , the individual dimensions ,energy

and voice analysis becomes clear. We are so much more than we perceive. When an individual experiences pain or health challenges it is because the sound frequencies have been disturbed. They become discordant by an underlying cause and effect, determining that cause is where DEVA comes into its own invaluable and non-invasive.

### **Frequency and the emotion**

While every organ and system present in the body has its own frequency and so does every emotion and feeling. This is true with every momentary passing emotion, anger, jealousy, love, all constructive and destructive emotion and feeling has a frequency. Since emotions are shared with the physical body parts it is so important to be healthy and balanced. When emotions become inflamed or exaggerated the resulting physical areas can become equally inflamed or exaggerated. So the emotion is encouraging on imbalanced flow of energy.

*“So think before you speak. One emotion out of line through the whole symphony of the emotional field throws the whole body out of balance” Colin Kingshott*

### **Our Emotional habitat**

We can see our organs and systems in the human form have their own keynotes and so does each and every emotion. We are emotional beings with a physicality of a human form and we need both of these in balance to have optimal energy and wellbeing.
